

THOMAS TIEDEMANN and
OTFRIED SCHWARZKOPF

Atty. Docket No. 825-161

Q 2 swash plate (16) can be adjusted, and with at least one piston (26, 28) connected to the swash plate (16) so that it can be actuated to move within a cylinder (22, 24), wherein the controller (18, 20) incorporates an adjustment unit (30, 32) that is separated from the piston (26, 28) and hydraulically driven,

characterized in that the adjustment unit (30, 32) is supplied with compressed oil by a hydraulic unit that is independent of the medium being propelled by the piston (26, 28).

Cancel claim 2 ✓

Cancel claim 3 ✓

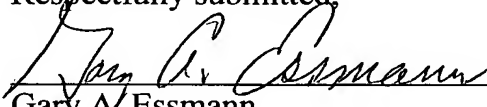

Add new claim 11 as follows:

Sub 65 11. Axial piston drive according to claim 1, characterized in that the adjustment unit (30, 32) is driven hydraulically.

Q 3 Add new claim 12 as follows:

12. Axial piston drive according to claim 1, characterized in that the swash plate (16) is support on a joint head (48, 50) that can be axially displaced by means of a setting piston (44, 46) of the adjustment unit (30, 32) and the swash plate (16) is connected by an off-centre joint (52) to a component (54) that is fixed in the axial direction.

Respectfully submitted,

Gary A. Essmann
